Background EMC, NetApp
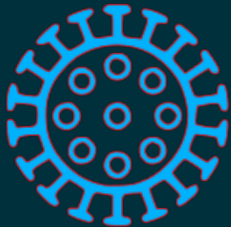

The Ransomware Pandemic
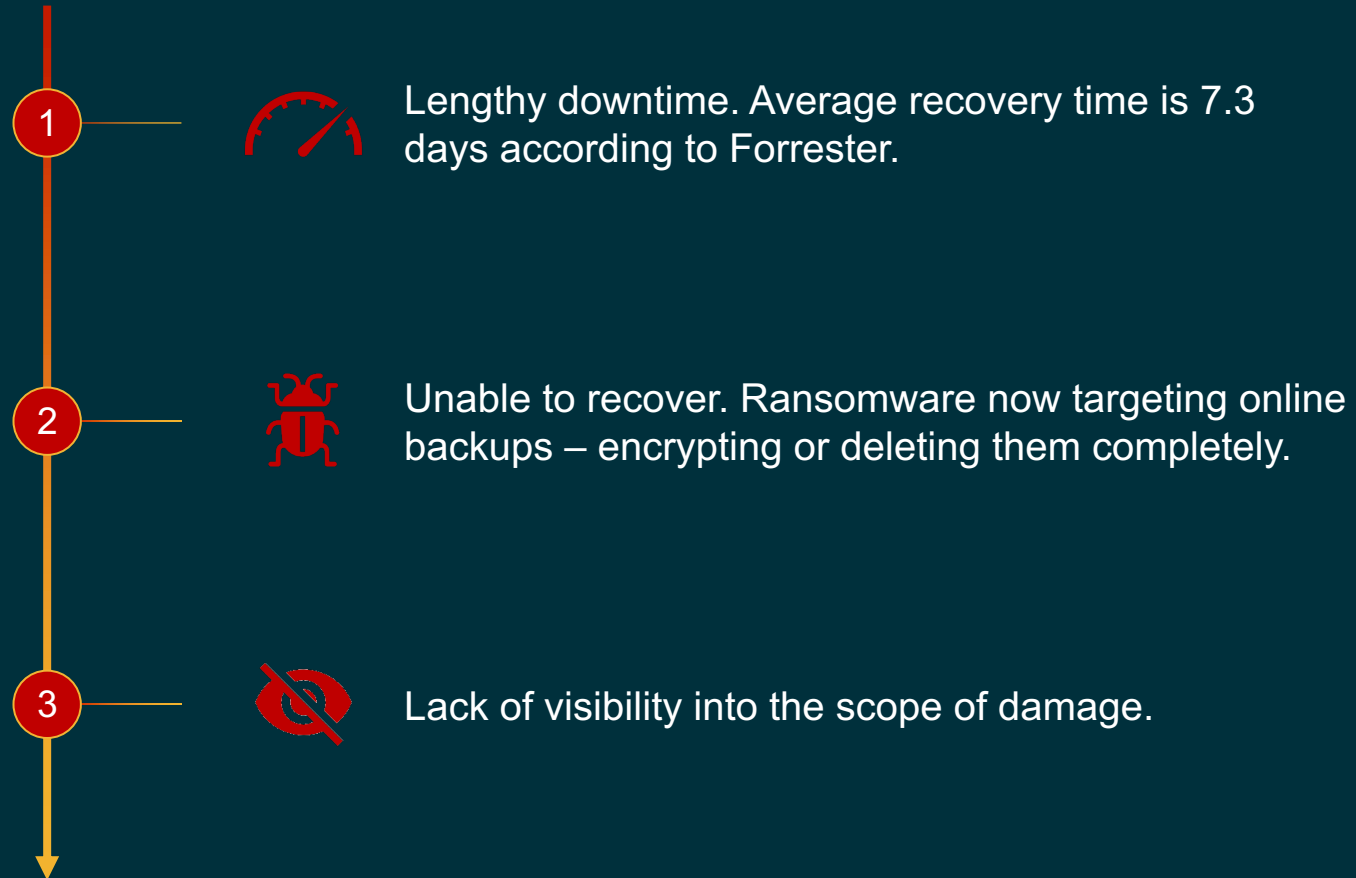

FBI
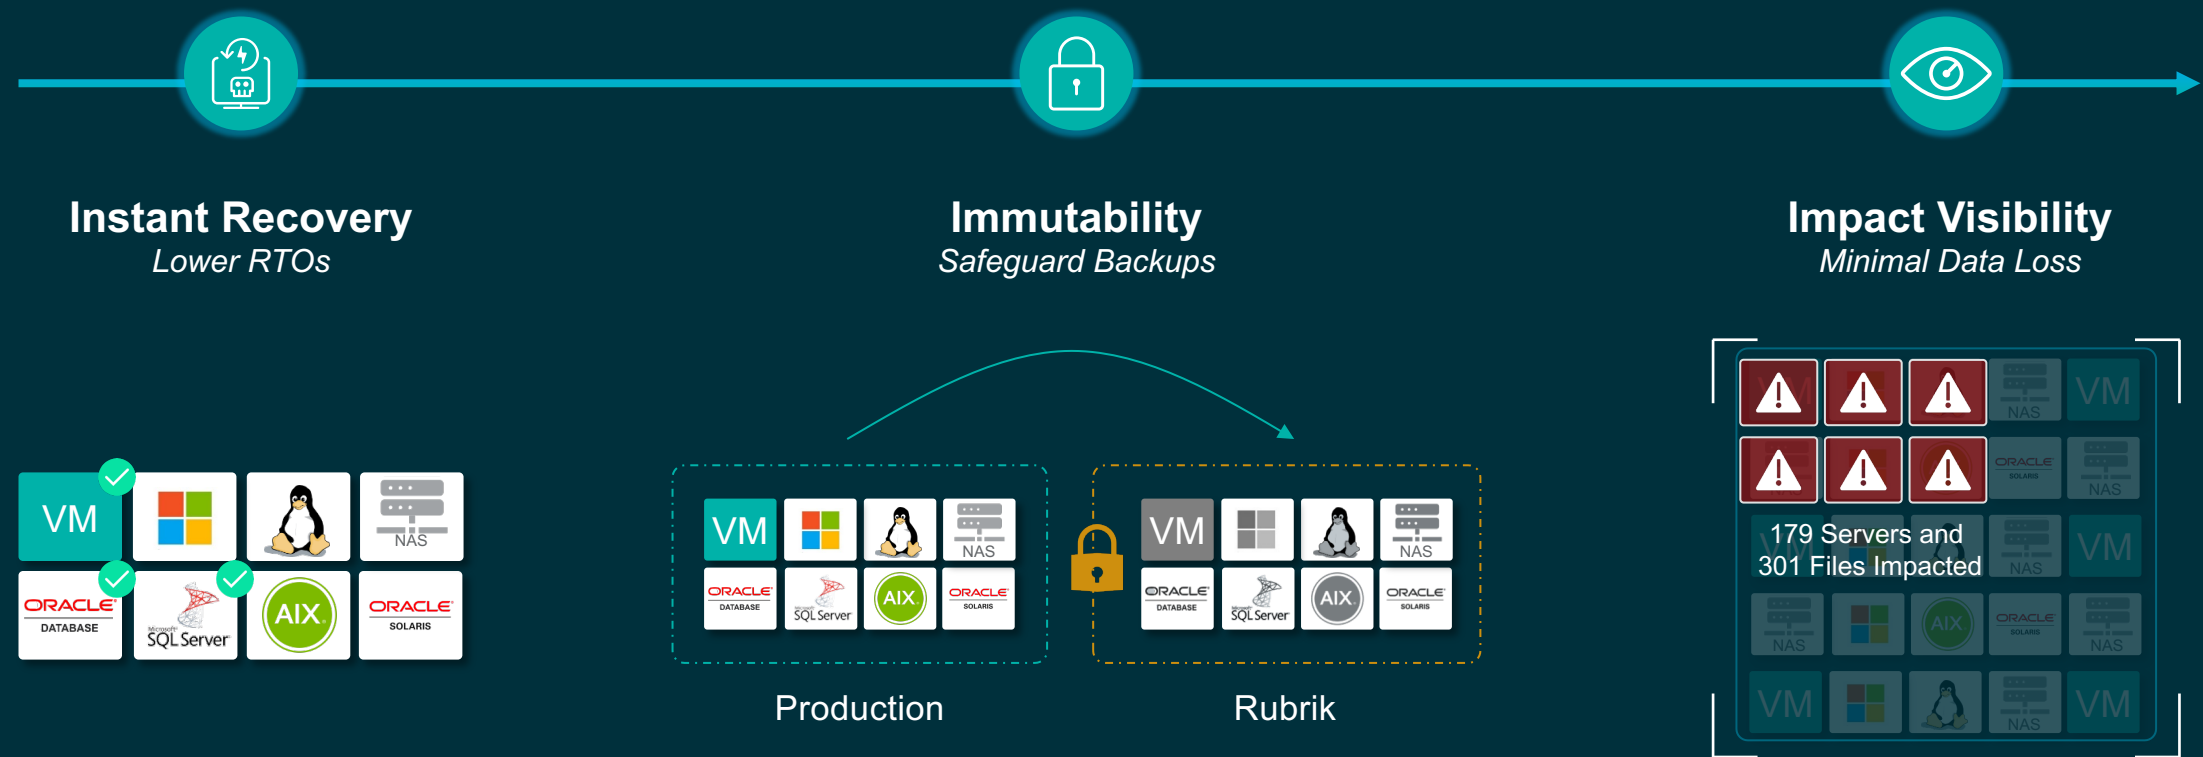

Ransomware market will be

+$1 BILLION

EUROPOL

Pandemic profiteering
how criminals exploit the
COVID-19 crisis

Why are Organizations Paying?

1. Lengthy downtime. Average recovery time is 7.3 days according to Forrester.

2. Unable to recover. Ransomware now targeting online backups – encrypting or deleting them completely.

3. Lack of visibility into the scope of damage.

Our Approach

Instant Recovery
Lower RTOs

Immutability
Safeguard Backups

Impact Visibility
Minimal Data Loss

Production

Rubrik

179 Servers and
301 Files Impacted

How It Works

Production Environment

Anomalous behavior detected
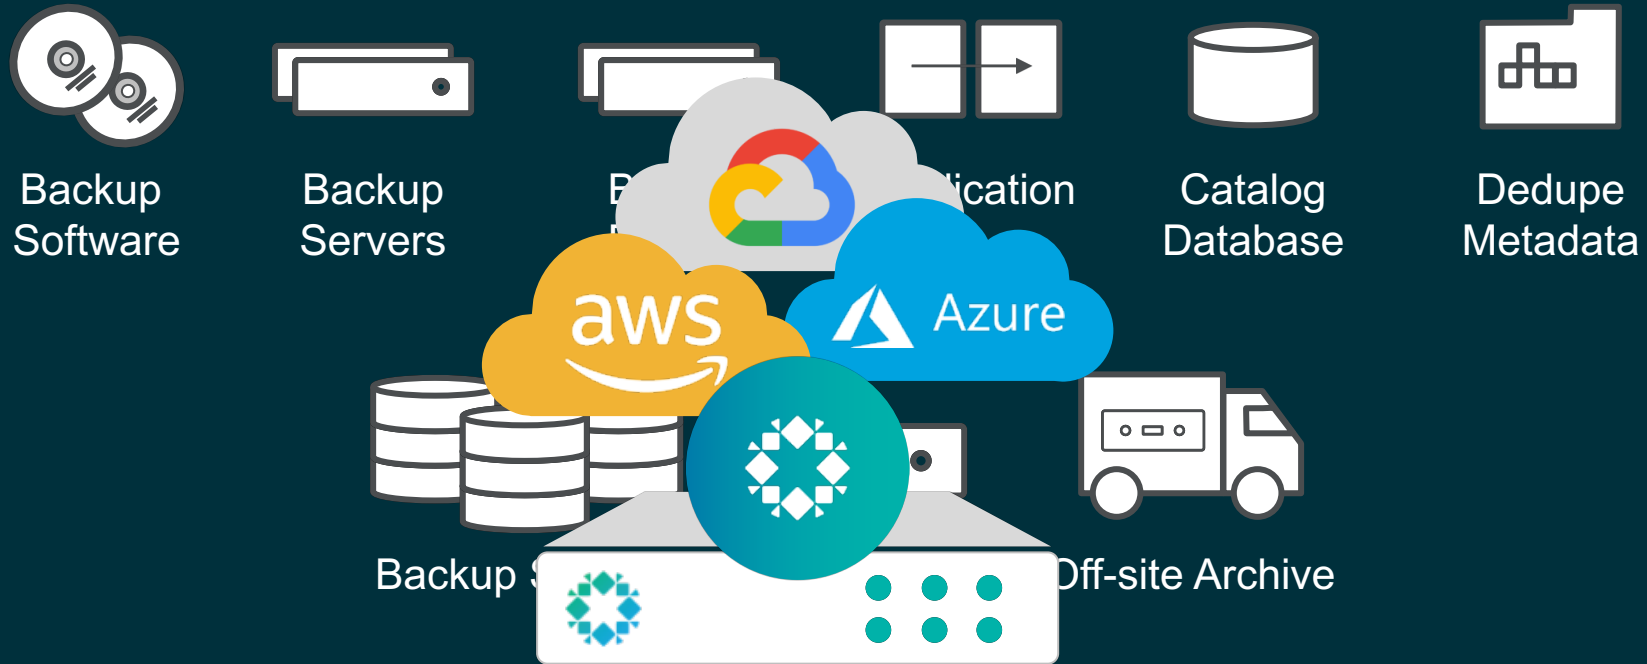

Quick Start: Plug and play. Auto-discovery.

Instant RTOs: Live Mount VMs, SQL & Oracle databases.

Secure: Immutable file system. End-to-end encryption.

Alerting: ML-based anomaly detection as last line of defense.

Granular Visibility: Automated assessment of attack surface area. Recover only impacted data.

Complete Data Management

Backup

Additional Benefits Unleashed

Modern Data Protection

Auto-pilot data protection policies.
Easy to manage.
Unlimited scale.
Lower TCO.

Cloud First

Protect cloud-native applications.
DR to cloud.
Cloud archival.

Automation

API-first.
Automate infra for application provisioning and recoveries.

rubrik

Summary

Instant recovery from ransomware

Immutable backups for defense

Visibility into attack impact

Don't Backup. Go Forward.
