

# Cyber Security Summit

ROMA, NOVEMBRE 2024

Domenico Iacono  
Presales Manager

# The AI impact for Cyber Resilience

## Threat detection

- Built-in predictive AI algorithms
- Gen-AI to identify new threats

## Security and compliance posture

- Identify security and compliance gaps
- Guided remediation

## Recovery planning

- Generate recovery plan/scenarios
- Automate recovery testing

## Operational Efficiency

- Active Insights/Troubleshooting
- Code generation

# It's time to transform cyber resilience for the cloud-first world.

---

Siloed tools	—————>	Platform consolidation for cloud-first resilience
Data backups	—————>	Securing cloud apps + AI stacks, end-to-end
Taken by surprise	—————>	Total readiness with on-demand cloud testing
Recovering data	—————>	Rebuilding clouds in near-real-time

## Continuous Business
